Our RAM software is the next leap forward: the culmination of a vision to create flexible technology that responds to changing demands. Our software is powered by features that include intuitive data entry and click boxes for clinical observations. Accurate report writing is made easy with split screen editing, automatic data calculations, physical demands comparisons, able creation, and report generation at the click of a button, and now comes with standardized REHAB protocols , Coding and Documentation , and educational materials. Metriks also designs and manufactures innovative tools used to perform FCE assessments and Quantitative Measures.
